Sir:

Please preliminarily amend the above identified application as follows:

In the Claims

1. (Amended) A recording apparatus comprising:
recording means for recording input first data in a recording medium;
input means for inputting a start point and an end point of desired
second data out of said first data to be recorded or already recorded in said
recording medium by said recording means; and
control means, when said start point and end point of said second data
are designated through said input means, for controlling said recording means
so as to endlessly-record said first data in said recording medium while
avoiding the recording region of said recording medium in which said second
data has been recorded.
